DETAILED ACTION

1. This Office Action is in response to the Amendment filed August 13, 2002.

Claim 29 is canceled.

Claims 1-28 and 30-32 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 8, and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasutaka et al. (JP-08083780) (Translation).

Yasutaka et al. teaches forming a concave in an insulating film formed on a substrate, forming a barrier layer, forming an interconnect metal film (copper or copper alloy) over the whole surface, polishing the surface by a first and second polishing processes until the surface of the insulating film other than the concave is exposed (Fig. 4,8, claims, Detailed description pages 1-8, Example pages 1-5). Yasutaka et al. discloses using a polishing slurry comprising silica polishing material and an inorganic salt, using an oxidizing agent (benzotriazole) (Detailed description pages 2-4, Means page 1-2). The polishing-rate ratio of the interconnect metal to the barrier metal film is a characteristic inherent in the material.

Response to Arguments

3. Applicant's arguments filed August 13, 2002 have been fully considered but they are not persuasive. Claims 1, 8, and 10-11 stand rejected.

Applicant argued that Yasutaka et al. fails to teach or disclose the polishing ratio of the interconnect metal to the barrier as claimed. However, Yasutaka et al. inherently teaches the polishing ratio as claimed (paragraph 0027, 0036).

In addition, a claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference. *Verdegaal Bros. v. Union Oil Co. of California*, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir.1987).

Allowable Subject Matter

4. Claims 13-28 and 30-32 are allowed.

Claims 2-7, 9, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2822

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
